AGENDA ITEM: Renew St. Louis Solar – Commercial Solar Program

Renew St. Louis Solar is an innovative new program design is the first of its kind in the Midwest. Like the GROW Solar STL program for residential customers, Renew STL Solar is a "group buy" program, meaning that installation prices improve when customers can pool their projects with other similarly-situated organizations. In addition, through our Customer Volume Discount, we are offering greater financial benefits as more customers participate. Essentially, this program will allow businesses to install solar on their operational buildings and begin saving money immediately, potentially with no upfront cost.

The Commission will continue discussion on promotion of this program to businesses to encourage renewable energy in our commercial sector and the best way to approach outreach.
