*Materials Used: soda cans, plastic sheeting,
decorative cabinet hardware and nails*

Aluminum cans are 100% recyclable, making them one of the most recyclable (and valuable) of all materials. Manufacturing cans out of recycled aluminum uses 95% less energy than using virgin material. The aluminum can you toss into your recycling bin today will be completely recycled and back on the store shelf in just 60 days.

Refab St. Louis accepts used hardware, windows, cabinets, trim and architectural salvage promoting creative re-use of our built environment.

Yard waste makes up a significant percentage of the total waste stream. Using yard waste collection service saves a considerable amount of landfill space across the country. There is another reason to recycle your yard waste. Strange as it seems, these materials can do real environmental harm if they end up in a landfill. But they can do our planet a world of good if they are recycled.
