 - Contractor-33%

The Removals count is based on number of trees and does not consider diameter.

The Planting of trees to replace ones damaged by the Emerald Ash Borer is compromised by the budget for replacements.

Council Member Klein reported that this would be her last meeting as she is not running for reelection.

She reported funding for a retention basin in Olivette is finalized, MSD continues to do channel clean-up while not officially taking responsibility to do so and Centennial Commons renovation are coming along. Renovations include mitigation steps to limit flooding in the future.

Agenda Item H: Unfinished Business

The draft Key Performance Indicators (KPI) developed last meeting were reviewed. It was agreed the Status category was very good with the exception that age was not measurable, Risk Mitigation items should be absorbed elsewhere, and Future Impacts was deemed to not be a Performance Indicator and should be recategorized as Future Actions.

Status:

Canopy Coverage	Percent vs. Goal
Number of Trees	Number
Number Pruned, Planted or Removed	# & %b of Goal / City vs. Contractor
Species Diversity	Number and Percent of Goal
Size Class Distribution	Number
Vacant Sites	Number Removed / Not Yet Replaced

Labor:

Percent of Contract Work vs. In-house	Manhours (may be misleading)
Volunteer Hours of Pruning Crews	Manhours
Storm Response Time	Manhours
Watering Hours	Manhours
Removal of Trees Deemed as Hazardous	Manhours

It was noted that perfectly healthy trees may become potentially hazardous, particularly storm related damage.

Items to be addressed in the future, possibly by sub-committees include the following:

- State and County Trees
- New Planting Areas
