July 23, 2013

Ms. Tina Charumilind
Finance Officer
University City Police and
Firemen's Retirement Fund
6801 Delmar Blvd.
St. Louis, MO 63130

Dear Tina:

Investors began 2013 focused on politicians and "sequester" banter in Washington. At mid-year, investors are still focused on Washington, but now it is more directed at the Federal Reserve. Pundits are evaluating the potential end of quantitative easing by the Fed. Our view is that it is unlikely that U.S. economic growth will rise to the prerequisite level stated by the Fed for stopping quantitative easing. We believe economic growth will remain below targeted levels, but corporate profits will continue to outgrow the economy making U.S. stocks even more attractive.

The Police and Firemen's Retirement portfolio, including the EuroPacific Growth Fund, had a gross of fees return of (0.1%) for the quarter ended June 30, 2013; versus the blended benchmark return of 0.2%.

During the first half of 2013, the U.S. equity market, as measured by the S&P 500 Index, recorded its best start to the year since 1998, finishing the second quarter up 2.9% and up 13.8% year-to-date. The Index rallied through May and hit a new all-time high of 1,669.16 on May 21, before declining due to Federal Reserve Chairman Ben Bernanke's speech on June 18 in which he reminded the markets that QE3 may end next year.

Although the U.S. economy continues to post below average economic growth of 2.0% annually, corporations continue to manage costs and improve efficiency, which has helped propel corporate earnings by 16.7% annually since the end of 2009. This earnings growth has accounted for most of the price appreciation in the Index, which continues to trade at an attractive 14.0 times expected earnings.

Our view regarding the potential end of the Federal Reserve's quantitative easing and Chairman Bernanke's recent speech centers on two key themes: 1.) The potential slowing of the Fed's massive QE stimulus program over the next twelve months, is conditioned upon economic growth improving substantially from its below average 2.0% growth rate. We doubt that economic growth will improve substantially before September's FOMC meeting and we continue to expect below average economic growth throughout the rest of this year. 2.) When growth does improve and quantitative easing is stopped, the fixed income market will likely respond with rising interest rates, as economic growth and long-term interest rates revert back to more normalized levels. Under this scenario, equity markets could continue with positive performance as the improvement in economic growth would support further gains in corporate profits.

We will continue to focus our equity strategy on corporate earnings growth, which we believe will continue to outpace economic growth. Our portfolio focus remains on large capitalization stocks with predictable earnings growth and above average dividend yields. We have also increased our focus on companies with exposure to North America and the US dollar, a process we began last year on concerns of slower growth in emerging markets. This strategy leads us to an overweight in consumer, industrial and telecommunications companies and underweights in financials, healthcare and utilities.

We will continue our objective of investing in companies with stable earnings growth and attractive dividend yields. We view this as the most prudent path to follow as we look for data supporting strength in the economy and stabilization in the political environment.

During the second quarter, the fixed income portfolio had a gross of fees return of (2.5%) compared to the Barclays Aggregate Bond Index return of (2.3%).

The fixed income portfolio slightly underperformed the Barclays Aggregate Bond Index in the second quarter due to three main factors. The portfolio underweighted mortgage-backed securities which turned out to be the best performing spread sector during the quarter. An overweight in corporate bonds hurt the performance of the portfolio as yields in this sector increased by more than comparable Treasuries during the last two months of the quarter. Lastly, yields in the five to seven year part of the yield curve increased significantly and the portfolio was overweight this portion of the curve. Excess performance was generated by the portfolio in two main areas. The portfolio held an underweight in securities maturing ten years and longer and benefited as a result of the steepening yield curve. Additionally, the performance of the portfolio was aided by favorable security selection within the corporate bond universe.

For the quarter, the account holding in the EuroPacific Growth Fund returned (0.8%) based on the NAV compared to (1.4%) for the Morgan Stanley Capital International World ex USA Index.

Regards,

Wiley D. Angell

Fixed Income:

1. The Index used in evaluating and reporting is the Barclays Capital U.S. Aggregate Bond Index.
2. The duration of the portfolio remained within the required range of 50% to 125% of the average duration of the Index during the reporting period. The portfolio ended with a duration of 4.9 years. This equated to 89% of the duration for the Barclays Aggregate and 91% of the Citigroup BIG Index.
3. No holdings of corporate bonds from a single issuer consisted of greater than 5% of the portfolio.
4. The average quality of the portfolio was Aa3/A+.
5. No securities were purchased that had a quality rating below investment grade (Baa3/BBB-).
6. No securities downgraded to a rating below investment grade (Baa3/BBB-) were owned in the portfolio.

Equity:

1. The Index used in evaluating and reporting performance is the Russell 1000 Index. The Index used for characteristics and sector comparisons is the S&P 500 Index, which is a proxy for the benchmark Russell 1000 Index.
2. Equity holdings consisted solely of marketable securities traded on U.S. exchanges.
3. No restricted stock, letter stock, or any other illiquid security was purchased during the quarter.
4. The portfolio characteristics at the end of the period are as follows: 12-month trailing P/E of 14.8, price/sales of 2.1, market weighted average five-year EPS growth rate of 13.9%, dividend yield of 2.9% and dollar-weighted average market capitalization of \$135 billion.
5. Total commissions generated throughout the quarter and year-to-date were \$418.74 and \$1,268.64, respectively.

Investment Strategy Report June 30, 2013

Gross domestic product in the U.S. has grown at a meager 2.0% in the past 3.25 years. Nevertheless, Federal Reserve Chairman Ben Bernanke last month opened a discussion of the conditions and timing for ending its monetary stimulus program known as “QE3”. He stated that “tapering” QE3 bond purchases will begin in September if the economy appears firm, and will end in June, 2014 if the economy is as strong as the Fed predicts it will be. The Fed also stated it will not raise interest rates for at least two years. Equity and bond markets both reacted with price declines resulting in bond and mortgage interest rates rising by about 0.5%. This sharp, negative reaction to what was intended to be an informational speech, not a policy change, raises questions about the impact on the economy and markets when the Fed, in fact, ends its QE3 stimulus.

We believe the end to monetary stimulus will have only a minor effect on the economy. Without a doubt QE3 exerted downward pressure on interest rates, which has helped the housing industry recover through the lowest mortgage rates in 50 years. On the other hand, low interest rates have cut the interest income for savers, particularly senior citizens. Their loss of purchasing power has helped to dampen consumption. In general, QE3 has added significantly to bank reserves. Since the majority of this money has not transformed into new bank loans, however, it appears QE3 has not materially impacted the economy.

QE3’s impact on the U.S. equity markets is unclear. Some believe that QE3 has emboldened the “don’t fight the Fed” speculators, who can be expected to exit equities when the program ends. Still, the equity market’s post-recession price recovery is close to exactly equaling the recovery in corporate profits. Both have surpassed their previous peaks made in 2007. Equities, in general, appear to be fairly valued which suggests that QE3 exerted only minimal price distortions.

Initially, a rise in yields would likely slow economic growth because it would immediately impact mortgage rates, which could hurt the construction industry. Longer term, however, we believe that higher rates would encourage bank lending, shift income to savers from speculators and help the economy grow at rates closer to its historical average. It would also have the beneficial effect of raising the cost of speculative, leveraged investments.

No one, including Chairman Bernanke, knows when the economy will strengthen enough to meet the Fed’s criteria for ending QE3. Economic growth throughout this recovery has been below average, despite multiple QE stimulus programs. We continue to like large cap stocks with predictable earnings growth and above average dividend yields. U. S. corporations have done a good job adapting to slow economic growth and have demonstrated an ability to grow their earnings faster than the U. S. economy.

INVESTMENT OBJECTIVES

University City Police and Firemen's Retirement Fund

1. Achieve appreciation while protecting principal.
2. Meet or exceed current actuarial assumptions over a market cycle (approximately 3-5 years).
3. Achieve a return over a market cycle to exceed the returns of the benchmark indices.

- (1) The fee rate for FAMCO managed assets is 0.25% of the portfolio's market value.
- (2) Prior to 6/30/08, the Domestic Equity benchmark reflects the S&P 500 Index. Since July 2008, it reflects the Russell 1000 Index performance.
- (3) The Total Domestic Blended Benchmark is 60% Domestic Equity / 40% Barclays Capital U.S. Aggregate Bond Index.
- (4) FAMCO does not manage the American Funds EuroPacific Growth Fund Class F shares, however, the Plan trustees have requested performance for the Fund be reported. FAMCO makes its best effort to provide a reasonable estimate of the net performance based on information provided from Schwab. Gross performance for the Fund is not provided. N/A = Not Applicable.
- (5) The Total Portfolio Blended Benchmark is 48% Domestic Equity / 12% MSCI World ex USA with gross dividends reinvested / 40% Barclays Capital U.S. Aggregate Bond Index.

OUR UNDERSTANDING OF THE INVESTMENT CRITERIA

University City Police and Firemen's Retirement Fund

ASSET CLASS	ALLOWABLE RANGE (%)	PORTFOLIO WEIGHT @ 3/31/13 (%)	PORTFOLIO WEIGHT @ 6/30/13 (%)
Equities	50-70	67	68
Fixed Income	30-50	33	32

EQUITY GUIDELINES

- Portfolio will be invested in large capitalization stocks traded on U.S. exchanges.
- On 6/26/07, per trustee direction, 12% of the total portfolio's assets were invested in the American Funds Europacific Growth Fund Class F Shares based on an investment policy change.

FIXED INCOME GUIDELINES

- Diversified portfolio of domestic, investment grade fixed income securities.
- The portfolio is actively managed relative to major sectors of the index.
- Portfolio duration range: 50% to 125% of benchmark.
- Individual security credit quality minimums: investment grade rating or better from Moody's or S&P.
- Maximum concentration limits (except U.S. Treasury/Agency) are as follows:

Single Issue:	5% of portfolio
Single Issuer:	5% of portfolio

PORTFOLIO ADJUSTMENTS DURING QUARTER

Significant Equity Model Trades – Q2 2013

Equity Security Purchases	Explanations
CVS Caremark Corp.	Moving into more US-based companies due to potential for rising dollar, stronger consumer, and slower EM growth. CVS has stable earnings growth, an attractive valuation, and significant free cash flow that is being used to pay dividends and buy back shares. The company is the largest prescription drug provider in the US. The company has taken market share from WAG and should continue to benefit from an aging population.
Lockheed Martin Corp.	Moving into more US-based companies due to potential for rising dollar and slower EM growth. LMT is a dominant player in its industry with an attractive dividend yield, strong balance sheet, and historically low valuation. The dividend yield of over 4% has steadily grown more than 20% per year for the past 5 years, as the company generates significant free cash flow. LMT also has fairly stable earnings and margins as the company does contracted work and is able to shed costs when the related projects are finished. According to the CBO, even if sequester cuts occur, defense spending is projected to grow 2.4% per year through 2012. Furthermore, politicians of both parties tend to support defense spending in their respective states because it creates jobs and revenue for the state. Some projects are even kept going year after year in order to maintain the knowledge and labor skills necessary for production, rather than stopping and restarting production again in the future.
Dr Pepper Snapple Group, Inc.	Stable earnings with not only an attractive and growing dividend yield, but also valuation metrics below peers (PE of 15 vs. approx. 19 for KO and PEP). \$10 billion market capitalization makes it a likely acquisition target in the much favored industry of food and beverage.
Kimberly-Clark Corp.	High quality, shareholder friendly company that has consistently increased dividend yield and share buybacks. Most business segments posting positive operating income growth. 30% plus return on equity.
General Mills, Inc.	High quality company with attractive growth and little exposure to Europe. Strong free cash flow generation will likely lead to a robust growth rate of not only the 3% dividend yield, but also share buybacks.
Additional Notes:	Added to position in CSCO.

PORTFOLIO ADJUSTMENTS DURING QUARTER (continued)

Significant Equity Model Trades – Q2 2013

Equity Security Sales	Explanations
H.J. Heinz Company	Acquired.
Deere & Company	Reducing cyclical stock exposure. DE likely to face increasing competition from Japan due to weaker Yen which has fallen -22% since Q4. In addition, record plantings in U.S. likely to push down ag prices.
Medtronic, Inc.	Slower growth expected this year (only 2% EPS growth). Risks related to expansion into emerging markets. Risks related to implementation of the Affordable Care Act and the new medical device tax. Moving funds into GIS and KMB, which have more stable and faster growth profiles than MDT, along with better dividend yields.

PORTFOLIO ADJUSTMENTS DURING QUARTER (continued)

Significant Fixed Income Trades – Q2 2013

Fixed Income Transactions	Explanations
04/15/13	Sell – Dominion Resources, take profits, raise cash for monthly benefit payment and reduce corporate exposure to 60% target.
05/10/13	Sell – Plains All American, take profits in the lowest yielding credit while reducing the corporate bond exposure to 60%.

Significant Cash Flows (Trade Date)

04/15/13	Client withdrawal sourced from cash.
05/15/13	Client withdrawal sourced from cash.
06/17/13	Client withdrawal sourced from cash.
